

3 Ministry | Strategy

EXECUTIVE SUMMARY:

The document outlines PRAY.COM's Ministry SaaS strategy, which aims to digitally transform ministries by integrating various tools into a unified platform.

- PRAY.COM's Ministry SaaS ecosystem includes PRAY TV, PRAY Radio, PRAYStudio, PRAY AI, and SuperFunnel, designed to enhance digital reach and financial sustainability for ministries.
- The strategy addresses challenges such as declining traditional broadcast reach, limited social media visibility, and high costs of traditional Christian media.
- The platform offers a comprehensive solution with features like AI-driven content automation, multilingual capabilities, and integrated analytics to optimize ministry operations.
- PRAY.COM targets various ministry segments, including traditional media migrators, digital-first ministries, and international ministries, offering significant cost savings and enhanced audience engagement.
- The competitive advantage lies in its integrated reach, cost leadership, data ownership, and faith-aligned AI models, positioning PRAY.COM as a leader in the faith technology landscape.

Ministry SaaS Strategy – Executive Summary

1. Core Strategic Thesis

PRAY.COM is redefining how ministries grow, engage, and sustain themselves digitally.

Our Ministry SaaS ecosystem unites five core domains — **PRAY TV**, **PRAY Radio**, **PRAYStudio**, **PRAY AI**, and **SuperFunnel** — into a single platform that transforms reach, automates ministry operations, and converts audience engagement into lasting financial sustainability.

This strategy is built on a simple truth: **ministries need the tools to evangelize and disciple effectively in a digital-first world.** [PRAY.COM](#) delivers those tools in one faith-aligned environment.

2. Market Context & Strategic Imperative

Christian media is undergoing a structural transformation:

- **Traditional broadcast decline** has accelerated as linear TV and radio audiences fall below 50% of prior reach.
- **Social media visibility collapse** limits organic reach to 2–5%, effectively silencing ministries online.
- **Digital-native believers** now control the world’s largest intergenerational wealth transfer — \$84 trillion — yet remain under-reached by legacy ministry systems.
- **Global demand** for faith-based digital engagement continues to surge: 20M+ PRAY users, 185 countries, and over 3B minutes of content consumed annually.

The opportunity is clear: lead the **digital reformation of ministry communications and discipleship**.

3. Ministry Pain Points

Ministry leaders face systemic limitations that prevent digital scale:

1. **Reach limitations** — restricted to local congregations or aging broadcast audiences.
2. **Manual content burdens** — sermons require extensive editing, translation, and posting.
3. **Data scarcity** — no insight into who listens, gives, or engages.
4. **Unsustainable costs** — traditional Christian TV averages \$500K–\$900K annually; radio \$240K+ per station.
5. **Fragmented tooling** — ministries manage separate email, CRM, video, and social systems with no faith-specific integration.

[PRAY.COM](#) eliminates each barrier through integrated reach, automation, and analytics.

4. Unified Platform Architecture

The Ministry SaaS Stack

Tier	Product/Annual Pricing	Strategic Function
Broadcast Layer	PRAY TV – \$91K	Global video distribution to 2.5M+ weekly viewers
	PRAY Radio – \$118K	700K weekly listeners; mobile-first global reach
Operational Layer	PRAYStudio Base – \$3K	Centralized content hub and analytics
	PRAYStudio Translation – \$2K	Multi-language voice-cloned sermon translation
	PRAYStudio CaaS – \$10K	Professional content-as-a-service production

	PRAYStudio Email & CRM – \$3K	AI-powered messaging and member management
Intelligence Layer	PRAY AI Counselor – \$4.1K/month	24/7 Biblically rooted pastoral care
	PRAY AI Insights – included	Audience data, donor intent, persona analytics
Growth Layer	SuperFunnel – \$5K/quarter	Donor conversion and digital discipleship funnel
Monetization Layer	Subscription+ / Ministry Match – included	Recurring revenue and audience expansion

This structure creates one unified ministry operating system — spanning content creation, distribution, engagement, and monetization.

5. Value Proposition Framework

Reach. Automate. Monetize.

- **Reach:** Broadcast to 20M+ faith-intent users globally through PRAY’s proprietary network.
- **Automate:** Deploy AI to summarize, clip, translate, and schedule ministry content automatically.
- **Monetize:** Transform engagement into recurring support via Subscription+ and donor automation.

The result: **a self-sustaining digital ministry model** that scales both spiritually and financially.

6. Target Ministry Segments

Primary Profiles

- **Traditional Media Migrators** – Established ministries transitioning from TBN, Daystar, or Salem networks seeking reach and analytics at 25% of prior cost.
- **Digital-First Ministries** – Social-media-driven pastors constrained by algorithms; need a faith-intent audience and automated content tools.
- **Growth-Stage Churches** – 1K–10K-member congregations aiming for national visibility without high technical overhead.
- **International Ministries** – Seeking multilingual expansion across global Christian audiences.

Decision-Maker Personas: Senior Pastors, Executive Pastors, Communications Directors, and Digital Media Leads.

7. Competitive Advantage

PRAY.COM holds the most defensible position in the faith technology landscape:

1. **Integrated Reach Superiority** — only platform combining TV, Radio, and AI content automation.

2. **Cost Leadership** — 75% less expensive than traditional Christian TV; 50% less than radio competitors.
3. **Data Ownership** — ministries access first-party analytics on audience demographics, engagement, and donor intent.
4. **AI Differentiation** — private, faith-trained AI models for content creation, translations, and counseling.
5. **Faith Alignment** — purpose-built for ministry impact, not secular advertising revenue.

[PRAY.COM](https://pray.com)'s integrated model positions it beyond Ministry Brands, Pushpay, and Gloo by delivering **reach, automation, and monetization in one platform**.

Competitors

- **Traditional TV/Radio:** High cost, delayed analytics → PRAY = lower cost, **real-time data**
- **Church software suites (Gloo/Ministry Brands/Pushpay):** Tools but **no built-in audience**
- **Streaming libraries (RightNow Media):** Content catalog, limited audience building
- **Point-AI tools:** Features without distribution or monetization

Traditional Media: K-LOVE (20M listeners, donation-dependent), TBN/Daystar (\$500K+ costs, limited analytics)

Digital Platforms: Ministry Brands (comprehensive but expensive), Pushpay (\$17.7K average, giving-focused)

AI Solutions: Gloo (\$110M funded but general), Church.tech (niche, limited integration)

Social Media: Facebook/YouTube (2-5% reach, mixed audiences, algorithm dependent)

Competitive Advantage: Only integrated platform with faith-intent audience, AI automation, and broadcast-quality reach

8. Strategic Model

The Ministry SaaS strategy operates as a **flywheel**, not a linear funnel:

1. **Acquire** new audiences via PRAY TV & Radio.
2. **Engage** through personalized content in PRAYStudio.
3. **Disciple** with AI-driven pastoral and devotional guidance.
4. **Convert** engagement into recurring revenue via SuperFunnel and Subscription+.
5. **Reinvest** analytics to optimize and expand ministry reach.

This cycle compounds over time, driving exponential growth in both audience engagement and donor participation.

9. Organizational Alignment

The Ministry SaaS ecosystem creates synergy across [PRAY.COM](https://pray.com) divisions:

- **Media Operations** manages content scheduling, analytics, and partner onboarding.
- **AI & Product Teams** develop proprietary automation and translation tools.

- **Sales & Partnerships** activate ministry onboarding, agency relationships, and channel growth.
- **Marketing & Brand** reinforce PRAY's authority as the #1 digital destination for faith.

Every department aligns under the shared mission: **Enable ministries to reach the world and sustain their calling through technology.**

10. Messaging Foundation

Positioning Statement:

[PRAY.COM](https://pray.com) is the all-in-one digital ministry platform that helps leaders reach millions, automate their operations, and generate sustainable revenue — all while staying rooted in Biblical truth.

Supporting Phrases:

- “From follower to donor, one seamless journey.”
 - “Digital discipleship powered by faith.”
 - “Stop renting audiences. Own your digital congregation.”
-

11. Strategic Outcomes

Organizational Objectives:

- Establish [PRAY.COM](https://pray.com) as the global standard for Christian digital media distribution.
- Expand recurring SaaS revenue across media and AI verticals.
- Strengthen partnerships with top 500 ministries in the U.S. and beyond.
- Demonstrate measurable kingdom impact through analytics, engagement, and donor conversions.

Impact Vision:

To equip every ministry, regardless of size, with the digital infrastructure needed to proclaim the Gospel, disciple believers, and sustain their mission in the modern era.

12. Closing Statement

[PRAY.COM](https://pray.com)'s Ministry SaaS strategy embodies the convergence of **faith, innovation, and stewardship**.

It empowers ministries to operate with the same sophistication as global media networks—without compromising the Gospel or their mission.

“We’re not digitizing ministry; we’re redefining what faithful impact looks like in the digital age.”

PRAY.COM ICP-Specific Value Proposition Pyramid

Each pyramid should show **four levels (bottom to top)**:

1. **Foundational Needs**
 2. **Product Capabilities**
 3. **Differentiators**
 4. **Core Brand Promise**
-

Mega Churches

Foundational Needs: Managing multi-campus content, ensuring brand consistency, and measuring engagement across congregations.

Product Capabilities: Centralized distribution with **PRAY TV**, feed ingestion, analytics dashboards, and audience segmentation.

Differentiators: Reliable, enterprise-grade infrastructure with clear attribution and seamless integration into existing stacks.

Core Brand Promise: *"Reach your congregation everywhere — and see the difference you're making."*

Parachurch Organizations

Foundational Needs: Scaling outreach beyond partner churches with limited staff and donor accountability.

Product Capabilities: **PRAY Studio** workflow automation, role-based governance, and cross-channel scheduling.

Differentiators: Lightweight ops, donor-ready analytics, and fast setup for immediate ROI.

Core Brand Promise: *"Extend your mission digitally with measurable, donor-ready impact."*

Media Ministries

Foundational Needs: Maintaining content quality, managing broadcast networks, and monetizing faith audiences.

Product Capabilities: **PRAY TV** and **PRAY Radio** for distribution, analytics tracking, and attribution to giving or attendance.

Differentiators: Proven faith-audience scale and cross-channel measurement in a single ecosystem.

Core Brand Promise: *"Amplify your broadcast impact — with verified engagement and reach."*

Podcasters / Faith Creators

Foundational Needs: Limited visibility, low discoverability in secular platforms, and minimal analytics.

Product Capabilities: **PRAY Radio** with RSS ingestion, distribution to faith audiences, and listener insights.

Differentiators: Faith-aligned platform, organic discovery, and analytics designed for creators.

Core Brand Promise: *"Share your message — we'll deliver it to the faith audience that needs it most."*

Nonprofits

Foundational Needs: Show impact to donors and expand awareness without extra staff.

Product Capabilities: **PRAY TV** for visual storytelling and **PRAY Studio** for campaign content ops with analytics exports.

Differentiators: Transparency, ease of use, and built-in ROI framing.

Core Brand Promise: *"Show your mission in action — inspire giving with measurable reach."*

Agencies (Faith Marketing Partners)

Foundational Needs: Multi-client coordination, campaign delivery, and analytics reporting.

Product Capabilities: **PRAY Studio** for client content ops, co-branded dashboards, and integration APIs.

Differentiators: Scalable partnerships, shared analytics, and guaranteed reach within faith audiences.

Core Brand Promise: *"Empower ministries you serve — with scalable, data-driven storytelling."*

PRAY.COM Messaging Houses by ICP

ICP 1 — Mega-church / Church Media Ministries

Big Promise:

“3x more reach than legacy Christian TV & radio at ¼ the cost — with real-time analytics that prove ROI in attendance and giving.”

Benefits (Pillars):

- Expand national presence with broadcast-quality reach
- Save \$400K+ vs. legacy TV/radio costs
- Real-time data instead of 6–12 month reporting delays
- Attribute media investments directly to measurable growth

Features (Foundation):

- PRAY TV: 2.5M weekly viewers, global reach
- PRAY Radio: 700K weekly listeners (more than Salem’s top 55 stations combined)
- Real-time analytics dashboards (demographics, attribution, giving insights)
- API/feeds for automated ingestion

ICP 2 — Media Ministries & Faith-based Shows

Big Promise:

“Turn fragmented tools and throttled algorithms into a unified growth engine with built-in audiences, donor funnels, and recurring revenue.”

Benefits (Pillars):

- Reach faith-intent users beyond social media silos
- Monetize with Subscription+ & Ministry Match
- Grow donor lists with built-in acquisition funnels
- Eliminate 5–7 tools for lower cost and less overhead

Features (Foundation):

- PRAYStudio: AI-powered content automation & distribution
- Subscription+: Converts premium subscribers into recurring donations
- Ministry Match: Intelligent new audience growth & email expansion
- SuperFunnel: Donor acquisition system delivering \$100K+ in 30 days

ICP 3 — Growth-Stage, Digital-Forward Churches (1,000–10,000 members)

Big Promise:

“Automate your digital ministry in days, not months — reaching new audiences, new languages, and new donors without new staff.”

ICP 4 — Agency/Network Multipliers (Christian media agencies & denominational partners)

Big Promise:

“Scale measurable growth across every ministry in your portfolio with plug-and-play acquisition

Benefits (Pillars):

- Replace manual workflows with automation
- Expand globally with 22–30+ languages at no staff cost
- Export engagement data to CRM & giving systems
- Build recurring revenue without extra fundraising overhead

Features (Foundation):

- PRAYStudio: One platform replacing email, social, translation, and analytics
- AI Translations with voice cloning in 22–30+ languages
- Workflow AI: Auto-generates social clips, posts, emails, and study guides
- CRM + analytics dashboards for engagement & donor attribution

funnels and attribution you can prove.”

Benefits (Pillars):

- Standardize results across clients
- Eliminate wasted ad spend with faith-intent targeting
- Deliver measurable donor acquisition & ROI reporting
- Differentiate agency/denomination with repeatable, data-driven success

Features (Foundation):

- SuperFunnel: 50M+ faith lookalikes, donor funnel automation, \$100K+ in 30 days
 - PRAYStudio: Centralized AI-powered content ops for multiple clients
 - Analytics & attribution dashboards across ministries
 - Optional PRAY TV/Radio: Top-of-funnel reach (2.5M TV viewers, 700K radio listeners)
-
