

2 Ministry | TAM, ICPs & Personas

EXECUTIVE SUMMARY:

This page explains the challenges that faith-based organizations (like churches and Christian nonprofits) face in getting steady donations, and how different roles within these organizations are involved in solving these problems. It also describes the types of organizations and individuals who are the best fit for digital tools that support fundraising and donor engagement.

 Buying Committee Structure Overview

Qualification Cheatsheet

▼ Key Points Summary

1. The Main Problem

- Many faith-based organizations struggle to secure consistent donations and maintain donor engagement.
- Leaders, pastors, and marketing teams feel the pressure to maintain steady funding.

2. Who's Involved?

- **Daily Problem Solvers:** Fundraising managers, outreach coordinators, pastors, and content creators who work directly with donors.
- **Budget Holders:** Executive Directors, Senior Pastors, Finance Directors, and church boards determine how funds are allocated for tools and platforms.
- **Decision Makers:** Top leaders (like CEOs or Executive Pastors) have the final say on purchases.
- **Solution Seekers:** Marketing and development professionals seek new tools to enhance donations and engagement.

3. The Market Size (TAM)

- The “Total Addressable Market” (TAM) for **digital giving and donor engagement** tools in the U.S. is approximately \$2 billion per year,

potentially rising to \$3–4 billion if more organizations are included.

4. What Types of Organizations Face This Problem?

- **Industry:** Churches, Christian nonprofits, ministries, and faith-based media.
- **Location:** Mostly in the U.S., especially in the South and Midwest.
- **Size:** Usually 5–200 employees, with \$500K–\$20M in annual donations.
- **Tech Level:** Moderate—open to digital tools but often need easy-to-use solutions.

5. What Tools Do They Use?

- **Donor Management:** Tools like [📲 Church Giving: Mobile App, Online & Text Giving for Churches | Tithe.ly](#), Pushpay, Planning Center Giving, etc.
- **Communication:** Email tools like Mailchimp or HubSpot.
- **Content:** Social media, YouTube, podcasts.
- **Websites:** Often built on WordPress or Squarespace.

6. When Are They Ready to Buy?

- When they're growing, launching new campaigns, hiring new leaders, winning grants, or switching to digital tools.

Who Are the Ideal Customers? (ICPs)

1. **Mega-churches/Media Ministries:** Large, national reach, big budgets, need automation and analytics.
2. **Media Ministries & Faith-based Shows:** Focused on digital content and audience growth.
3. **Growth-Stage Churches:** Expanding beyond their local area, want to automate and reach more people.
4. **Agencies/Networks:** Serve multiple ministries, want repeatable results for clients.

Who Are the Personas? (Key Roles)

- **Visionary Pastor:** Sets the big-picture vision, cares about growth and impact.
- **Executive Builder:** Manages budgets and teams, wants efficiency and proof of results.
- **Storytelling Strategist:** Handles content and engagement, wants to know what works.
- **Operational Gatekeeper:** Ensures everything runs smoothly and securely.
- **Faithful Creator:** Creates content (such as podcasts or videos) and wants easy publishing and analytics.

- **Impact-Focused Nonprofit Leader:** Needs to show donors the impact of their gifts.

How Do They Make Buying Decisions?

- There's usually a committee: top leaders set the vision and budget, others evaluate usability and fit, and end users test the tools.
- The buying process goes through stages: Awareness → Evaluation → Decision → Adoption.

TAM, ICPs & Personas

TAM Research

Estimation basis:

- There are roughly **~350,000 + religious congregations** in the U.S., according to the U.S. Religion Census (356,642 congregations recorded)
- For simplicity, assume your target segment consists of Christian churches/ministries that are actively seeking to improve digital giving/donor engagement (for example, approximately 200,000 of these).
- If you estimate the average annual spend on digital giving & donor-engagement solutions (software/services/consulting) to be, for example, **US\$5,000** (for smaller ministries) up to **US\$50,000** (for larger ones), we can select a midpoint of, say, US\$10,000 as the annual value.

Thus:

TAM = ~200,000 organizations × US\$10,000 = **US\$2 billion/year**.

You could also expand the TAM by including other Christian nonprofits beyond strictly churches (such as ministries, media, and missions) or by including allied donor-engagement tools — so one could argue that the TAM might be US\$3-4 billion.

TAM	~US\$2 billion/year (or possibly up to US\$3-4bn)
-----	---

 Pain Point

“I’m struggling to reach and get constant donations from American Christian Believers.”

1. Who experiences the problem daily?

Faith-based nonprofit leaders, pastors, and ministry marketing teams experience this problem every day.

They are the ones responsible for maintaining donor relationships, running campaigns, and ensuring consistent funding. Specifically:

- **Digital fundraising managers** are trying to grow online giving.
- **Outreach coordinators** are working on donor engagement through email or social media.
- **Church administrators or pastors** managing tithes and offerings with limited tech support.
- **Christian content creators or mission organizations** rely on small recurring donations.

These individuals directly feel the stress of fluctuating donations and the difficulty of maintaining monthly giving momentum.

2. Who has the budget?

Decision-makers within faith-based organizations or Christian nonprofits typically hold the budget.

Typically:

- **Executive Directors or Senior Pastors** – approve or allocate funds for donation platforms, marketing tools, or partnerships.
- **Finance or Development Directors** – manage budgets for donor retention programs or CRM systems.
- **Church boards or trustees** – release funds for digital transformation or outreach campaigns.

These roles decide which tools or services to invest in to improve donation consistency.

3. Who has the buying authority?

Executive leadership or lead pastors usually have final approval for purchases or partnerships.

- In larger churches, the **Executive Pastor or COO** has authority.
- In nonprofits, the **CEO, Executive Director, or Head of Development** approves spending.
- In smaller ministries, the **founder or pastor** often plays all these roles and makes direct decisions on purchases.

They are the gatekeepers who say “yes” or “no” to investing in new tools or marketing solutions.

4. Who is actively seeking solutions?

Marketing and development professionals in Christian ministries are the ones actively looking for answers.

They’re searching for:

- **Better donor engagement platforms** (like [Pray.com](https://www.prayer.com), Pushpay, Church Giving: Mobile App, Online & Text Giving for Churches | Tithe.ly, etc.).
- **Marketing automation or CRM systems** tailored to Christian audiences.
- **Consulting, storytelling, or content strategies** to connect emotionally with believers.

- **Recurring donation optimization** techniques (e.g., subscription-style giving).

These individuals are attending Christian leadership conferences, subscribing to church tech newsletters, and exploring faith-based marketing tools.

Summary

Role	Daily Problem	Budget	Buying Authority	Actively Seeking Solutions
Marketing/Fundraising Managers	Yes	Influence	Sometimes	Yes
Pastors / Church Admins	Yes	Shared	Yes	Sometimes
Executive Directors / Senior Leaders	Occasionally	Yes	Yes	Sometimes
Development Directors	Yes	Yes	Sometimes	Yes

Firmographic Criteria

These are the structural and demographic attributes of organizations that face this problem and can afford a solution.

Attribute	Description
Industry	Faith-based organizations, churches, Christian nonprofits, ministries, and mission-driven media organizations.
Location	Primarily in the United States (especially the South, the Midwest, and the Bible Belt regions), with a growing segment in urban/metropolitan areas.
Size (Employee Count)	5–200 employees — typically midsize ministries or nonprofits with structured donor programs but limited in-house tech or marketing resources.
Annual Revenue	\$500K – \$20M in donations or charitable income. This range reflects organizations that have some budget flexibility for marketing, donor engagement, and tech solutions.
Organizational Type	501(c)(3) nonprofits, independent churches, denominational ministries, and Christian

	media/podcast networks.
Decision Makers	Executive Pastors, Executive Directors, Development Directors, Marketing Managers, or Fundraising Coordinators.

Technographic Criteria

These describe the tools and systems that indicate a ministry's digital maturity and readiness to adopt your solution.

Attribute	Description
Donor Management Tools	Uses or is evaluating systems like http://Tithe.ly , Pushpay , Planning Center Giving , Kindrid , Breeze , or DonorPerfect .
CRM / Communication Tools	May already use HubSpot , Mailchimp , Constant Contact , or Faithlife for email or automation.
Content & Engagement	Relies on social media, YouTube, or podcast platforms (Pray.com, Spotify, Apple Podcasts) to reach Christian audiences.
Website Platform	Often built on WordPress , Squarespace , or Subsplash with donation or prayer widgets.
Tech Maturity Level	Moderate — open to digital transformation but often lacks in-house technical expertise. They seek turnkey, faith-aligned solutions that don't require heavy setup.
Opportunity Signals	Outdated giving forms, poor mobile UX, or fragmented engagement channels (e.g., separate systems for giving, prayer, and content). These gaps signal readiness for better solutions.

Behavioral Criteria

These reflect **timing, intent, and trigger events** — the best moments to engage your ICP.

Attribute	Description
Recent Growth or Outreach Expansion	Hiring digital ministry, communications, or development staff. Indicates active investment in outreach and donor engagement.
Campaign Activity	Launching new giving campaigns, seasonal donation drives (e.g., Christmas, Easter), or mission outreach. They're in fundraising mode.

Leadership Changes	New Executive Pastors, Development Directors, or Marketing Heads often seek modern solutions to prove impact quickly.
Funding or Grant Wins	Recent grants or partnerships from foundations (e.g., Lilly Endowment, Barna Group) can free up budgets for tech and engagement tools.
Technology Shifts	Switching from traditional to digital tithing, adding podcasts or prayer apps, or migrating CRM platforms. Indicates readiness to adopt new digital solutions.
Active Content Creation	Ministries that regularly produce sermons, devotionals, or podcasts are already focused on engagement and are more open to audience monetization tools.

At the Intersection

The **sweet spot** for your ideal customer lies at the intersection of:

- **Firmographics** → Mid-sized U.S. Christian organizations with consistent donor activity.
- **Technographics** → Using outdated or disjointed giving tools and seeking integrated engagement platforms.
- **Behavioral triggers** → Actively hiring, expanding digital reach, or launching new donor campaigns.

Ideal Customer Profiles (ICPs)

1 ICP 1 — Mega-church/Church Media Ministries/Parachurch Organization

Org profile: \$5M–\$10M annual revenue; 50–100 staff; broadcast-ready weekly content; aims for national presence & automation.

Top pains: High traditional media cost & delayed data; fragmented tools; algorithm-capped reach (2–5%).

What “good” looks like: Measurable, real-time audience growth; fast ingestion (feeds/API); clear attribution to giving/attendance.

Likely budget band: \$91K–\$200K+ blended (TV/Radio + Studio add-ons).

Best-fit bundle(s):

- **Broadcast Growth:** PRAY TV (Standard/Sunday) + PRAY Radio (M–F) for scale at ~¼ cost vs. legacy TV.
- **Digital Engine:** PRAYStudio Base + Translations + Email Sends to replace 5–7 tools and expand globally.

2 ICP 2 — Media Ministries & Faith-based Shows

Org profile: \$1M–\$5M revenue; 10–50 staff; digital-first production; focused on audience growth & monetization.

Top pains: Algorithmic throttling, tooling overhead, unpredictable donor acquisition.

What “good” looks like: Faith-intent reach, on-platform conversion paths (Subscription+, Ministry Match), and donor funnels.

Likely budget band: \$24K–\$118K+ depending on mix (Studio + Radio/TV Off Hours + SuperFunnel pilot).

Best-fit bundle(s):

- **Revenue Flywheel:** Studio + Subscription + Ministry Match.
- **Acquisition Sprint:** SuperFunnel (30–90 days) with broadcast promos.

3 ICP 3 — Growth-Stage, Digital-Forward Churches

Org profile: Building beyond geography; wants to consolidate stack and add languages. The decision unit comprises the Senior/Executive Pastor, Communications Director, and Media Manager.

Top pains: Manual workflows; limited reach clarity; need for recurring revenue without hiring.

What “good” looks like: Days-not-months time-to-value (feeds light up); segmentation; export to CRM/giving.

Likely budget band: \$24K–\$72K+ (Studio base + a couple add-ons, optionally TV Off Hours).

Best-fit bundle(s): **Digital Engine** (Studio + Translations + Email) to automate ops and reach multi-lingual audiences.

Partnership: Agency/Network Multipliers

Org profile: Agencies serving multiple ministries; denominational media/communications hubs. Seek repeatable reach + ROI for portfolios.

Top pains: Scaling results across clients; lack of end-to-end funnel & attribution; wasted ad spend.

What “good” looks like: Plug-and-play acquisition system, clean attribution, partner programs.

Best-fit bundle(s): SuperFunnel + Studio for portfolio lift; optional TV/Radio for high-intent top-of-funnel.

Personas

1. The Visionary Pastor

(Senior / Lead Pastors in Mega Churches, Parachurches, and Media Ministries)

Profile

- Strategic vision-setters focused on growth and reach beyond the sanctuary.
- Often serve large audiences (10K–100K+) and oversee multi-channel content strategies.
- Rely on staff for operations, but personally care about *impact metrics* and *ROI visibility*.

Key Pain Points

- Unclear *attribution* between content reach and attendance/giving.
- Frustration over disconnected analytics tools and a lack of actionable insight.
- Desire for digital evangelism *without technical friction*.

Primary Goals

- **“Reach and prove.”** Expand reach while tracking real spiritual and financial impact.
- Simplify reporting to boards or donors using measurable engagement dashboards.
- Leverage PRAY’s reach as amplification for teaching and discipleship content.

Buying Motivation

- Wants *strategic visibility* → invests in analytics + attribution.
- Budget flexibility if tied to quantifiable outcomes.

Positioning Message

“Multiply your ministry’s reach — and see the lives you impact.”

Highlight **audience growth**, **content-to-outcome analytics**, and **ROI calculators**.

Product Fit

- **PRAY Growth Suite** or **Enterprise Package** (distribution, analytics, attribution exports).
 - Bundled “Impact Dashboard” for attendance and giving metrics.
-

2. The Executive Builder

(Executive Pastors / C-Suite in Mega or Parachurch Orgs)

Profile

- Business-minded ministry operators managing teams, budgets, and outcomes.
- Focused on efficiency, reliability, and performance proof for leadership.

Key Pain Points

- Manual workflows slow down campaigns.
- Unclear ROI from content programs.
- Integration headaches (CRM, donor system, SSO, or exports).

Primary Goals

- Increase *operational efficiency* and *data visibility*.
- Deploy content faster with fewer manual steps.
- Consolidate analytics across content, giving, and outreach.

Buying Motivation

- Seeks clear time-to-value, predictable pricing, and minimal risk.

Positioning Message

“Operational excellence for digital ministry.”

Lead with **workflow automation**, **feeds/API ingestion**, and **integration reliability**.

Product Fit

- **PRAY Enterprise** with governance/permissions + SSO + CRM exports.
 - ROI calculator + pilot programs to de-risk buying decisions.
-

3. The Storytelling Strategist

(Communications / Media Directors in Mega, Media Ministries, and Agencies)

Profile

- Responsible for creative storytelling, content packaging, and engagement metrics.
- Measures success via reach, impressions, and audience sentiment.

Key Pain Points

- Fragmented analytics make it hard to know *what resonates*.
- Manual ingestion eats creative bandwidth.
- Lacks fine audience segmentation, ICP Pain Points.

Primary Goals

- Find out which messages and topics drive engagement.
- Optimize content for performance (audio/video/social).
- Automate ingestion and publishing to reduce friction.

Buying Motivation

- Values **speed, analytics clarity, and proof** of content success.

Positioning Message

“Tell better stories — and see their impact.”

Highlight **performance dashboards, feed-based automation, and audience segmentation.**

Product Fit

- **PRAY Pro / Growth tiers** with analytics, segmentation, and RSS/API ingestion.
 - Add-on: *Campaign Analytics & Content Performance Dashboard.*
-

4. The Operational Gatekeeper

(Operations / Admin Leadership in Parachurches, Nonprofits, or Agencies)

Profile

- Tasked with ensuring consistency, compliance, and reliability.
- Works cross-functionally with tech, media, and pastoral staff.

Key Pain Points

- Manual Workflows and Approval Bottlenecks: ICP Pain Points.
- Poor governance — unclear roles and permissions.
- Fear of errors in public-facing content.

Primary Goals

- Enforce content approval workflows.
- Ensure data accuracy and platform reliability.
- Reduce human error through automation.

Buying Motivation

- Driven by reliability, not emotion.
- Prefers stable vendors with security assurances and clear SLAs.

Positioning Message

“Reliable, governed, and compliant content operations — built for ministries.”

Emphasize **roles/permissions, feed health visibility, and security documentation.**

Product Fit

- **PRAY Enterprise** with roles, permissions, and feed health reports.
 - Roadmap: *Feed Status Dashboard + Ingestion SLA.*
-

5. The Faithful Creator

(Content Creators / Hosts / Podcasters / Media Personalities across all orgs)

Profile

- Independent or media-ministry-based content producers.
- The goal is audience expansion and brand amplification through faith storytelling.

Key Pain Points

- Limited time to manage publishing across platforms.
- Lacks analytics visibility to see audience demographics.
- Needs easy syndication (RSS/feeds) to multiple destinations.

Primary Goals

- Broaden reach with minimal effort.
- Gain insights into who is listening/viewing and why.
- Build brand recognition in the faith content ecosystem.

Buying Motivation

- Simplicity + exposure; not infrastructure.

Positioning Message

“Focus on your message — we’ll handle your reach.”

Lead with **simple ingestion**, **automatic distribution**, and **engagement visibility**.

Product Fit

- **PRAY Creator Tier / Lite SaaS** with feed ingestion and basic analytics.
- Optional upgrade: Audience Dashboard and Content Export.

6. The Impact-Focused Nonprofit Leader

(Directors or Executives in Nonprofits, Parachurches, or Agencies)

Profile

- Mission-driven, donor-funded organizations.
- Balances outreach goals with strict budget stewardship.

Key Pain Points

- Need a clear ROI for donor reporting ICP Pain Points.
- Desire for impactful storytelling with quantifiable metrics.
- Limited time and staff to manage digital distribution.

Primary Goals

- Demonstrate measurable community reach.
- Streamline content dissemination.
- Showcase impact to supporters and boards.

Buying Motivation

- Motivated by **proof of impact** and **cost efficiency**.

Positioning Message

“Extend your mission — and show your impact.”
Focus on **data-backed storytelling**, **cost-to-reach framing**, and **pilot packages**.

Product Fit

- **PRAY Starter / Pilot Program** — fast setup, prebuilt analytics, transparent pricing.
- Tools: ROI calculator + “Impact Summary” dashboard template.

 Cross-Persona Insights by Cluster

Cluster	Roles & Types Most Affected	Primary Need	PRAY’s Opportunity
Strategic Impact	Senior/Lead Pastors, Executives	Proof of outcomes	Double down on analytics attribution & ROI framing
Operational Efficiency	Ops/Admin, Media Directors	Automation, reliability	Strengthen ingestion reliability & governance
Audience Growth	Storytellers, Creators	Reach & resonance clarity	Deepen segmentation + campaign performance insights
Financial Stewardship	Nonprofits, Parachurch orgs	Cost-to-reach transparency	Emphasize low- lift pilots & ROI tools

 Positioning Themes (Unified Messaging Spine)

1. **“Reach more — and prove it.”**
Quantifiable reach + attribution to ministry outcomes.
2. **“Built for ministry workflows.”**
Feeds, governance, and analytics that fit existing processes.
3. **“From sermon to impact.”**
Content → engagement → giving outcomes.
4. **“Right-sized for every ministry.”**
Tiered packaging and transparent ROI.

💡 Buying Committee Structure Overview

• Top-Level Decision Makers (Budget + Vision)

- Visionary Pastor and Executive Builder control budget, direction, and vendor selection.
- They value reach, ROI, and alignment with ministry goals.

• Influencers (Creative + Operational)

- *Storytelling Strategist* and *Operational Gatekeeper* evaluate PRAY's fit for workflows, analytics, and content management.
- They champion usability and governance throughout the evaluation process.

- **Users (Execution + Proof)**

- *Faithful Creator* and internal staff serve as early testers. Their satisfaction impacts renewal and advocacy.

- **External Partners**

- *Agency Executive* often acts as a **consulting influencer** — recommending PRAY to client ministries or integrating it into broader digital campaigns.

 Buying Dynamics Summary

Buying Stage	Lead Persona(s)	Supporting Persona(s)	Decision Criteria	PRAY Messaging Priority
Awareness	Storytelling Strategist, Faithful Creator	Visionary Pastor	Awareness of reach, audience growth, and faith media relevance.	“Expand your message. Reach more people of faith.”
Evaluation	Executive Builder, Operational Gatekeeper	Storytelling Strategist, Agency Executive	Workflow alignment, analytics, integrations, and pricing.	“Operational excellence + measurable outcomes.”
Decision	Visionary Pastor, Executive Builder	Impact-Focused Nonprofit Leader, Agency Executive	ROI, mission fit, budget confidence, governance assurance.	“Faith-driven impact backed by data.”
Adoption / Renewal	Operational Gatekeeper, Faithful Creator	Executive Builder	Ease of use, support, and demonstrable results.	“Grow together — measurable engagement, lasting ministry impact.”

 Practical HubSpot Mapping

- **Buying Role (HubSpot Property):** Assign each persona as *Decision Maker*, *Influencer*, *Technical Buyer*, or *End User*.
- **Deal Stage Mapping:**
 - Awareness → *Marketing Lead Nurture*

- Evaluation → *Opportunity / Demo Scheduled*
- Decision → *Closed Won / Signed*
- Adoption → *Customer Success / Retention Workflow*

🌱 Committee Hierarchy Overview

Tier	Personas	Core Responsibilities	Influence Type
Executive Tier	Visionary Pastor, Executive Builder, Impact-Focused Nonprofit Leader	Sets vision, authorizes spend, demands measurable ROI.	Strategic & Financial Decision-Making
Evaluator Tier	Storytelling Strategist, Operational Gatekeeper	Validates usability, integrations, and operational alignment.	Technical & Functional Evaluation
Execution Tier	Faithful Creator, Agency Executive	Produces, deploys, and promotes content across platforms.	End-User Advocacy & External Influence

💡 HubSpot Implementation Tip

HubSpot Property	Persona Examples	Automation Use
Buying Role	Visionary Pastor → <i>Decision Maker</i> ; Operational Gatekeeper → <i>Technical Buyer</i>	Lead routing & sales playbooks
Lifecycle Stage	Faithful Creator → <i>Awareness</i> ; Executive Builder → <i>Decision</i>	Automated nurture flows
Influence Score (custom)	Visionary Pastor = 10, Storytelling Strategist = 7, Faithful Creator = 5	Weighted scoring for multi-contact deals

Qualification Cheatsheet

1. Weekly time on content & social? (Quantifies automation value.)
2. Annual spend on media/tools/translation/analytics? (Reallocation case.)
3. Priority languages/regions this year? (Translations fit.)

4. Bottlenecks from sermon → distribution → donor? (Workflow & SuperFunnel.)

5. How do you measure impact today? (Attribution toolkit.)

✓ Qualification Cheatsheet Examples

Qualification Cheatsheet (Use on Every Discovery)

1. Weekly time on content & social?

(Quantifies automation value.)

- “How many hours per week does your team spend creating and managing content or social media?”
- This helps you understand if automation could save them significant time.

2. Annual spend on media/tools/translation/analytics?

(Reallocation case.)

- “What is your annual budget for media, digital tools, translation, or analytics?”
- This shows if they have budget flexibility and where your solution could fit in.

3. Priority languages/regions this year?

(Translations fit.)

- “Are there specific languages or regions you’re prioritizing for outreach this year?”
- This helps identify if translation or localization features are relevant.

4. Bottlenecks from sermon → distribution → donor?

(Workflow & SuperFunnel.)

- “What are the biggest bottlenecks or slowdowns in your process from creating sermons/content to distributing it and engaging donors?”
- This uncovers workflow pain points your solution can address.

5. How do you measure impact today?

(Attribution toolkit.)

- “How do you currently measure the impact of your content or campaigns?”
- This reveals if they need better analytics or attribution tools.

Quick next steps

- 1. Package by ICP:** Lead with the two core ICPs above; keep Growth-stage and Agency as expansion.
- 2. Persona-mapped assets:** Exec 1-pager (cost-to-reach & board metrics), Comms demo (feeds→analytics in minutes), Producer checklist (workflow & support), Agency ROI sheet (SuperFunnel attribution).
- 3. Pilot offers by ICP:**
 - Mega-church: 90-day TV Standard + Studio.
 - Media ministry: 30-day SuperFunnel + Studio Base.

- Growth-stage: Studio Base + Translations launch plan (Month 2).
-
