Feature: AI Counselor

Problem Statement

Churches are overwhelmed with Counseling needs. People are suffering from a mental health epidemic. Mental health is in greater demand than ever before and prayer and faith is one of the greatest natural tools that people have to combat mental health. We are going to meet the demand by supplying an AI Counselor. Users of the Pray.com app can subscribe to our AI Premium plan to get access to our AI Counselor feature.

Feature Objective & Goals

AI Counselor will help people overcome and get through life's challenges with Biblical wisdom. We will measure success by seeing the willingness for people to pay and use the product.

1. MVP Launch by end of June
2. 100 Subscribers in first 30 days
3. 10% increase in ARPU

Feature Description

We will take over a tab on the bottom navigation (Probably Sleep) for Counselor. People will be able to go to this tab and subscribe to start engaging with AI Counselor. There will be no trial for this product. A user can simply start conversing with the AI Counselor to receive biblical wisdom to overcome any of their struggles or simply talk.

Research Insights

15% of all LLM conversations are around counseling, most of which is not Biblically based.

[Pray.com](https://www.pray.com) is clinically tested. Also, the number one reason people come to [Pray.com](https://www.pray.com) is for some sort of mental health related reason.

All Pastors act as a counselor and therefore all churches provide a counseling service. Some have a formal service and some informal through conversations. However, most have some semblance of a formal counseling service where a member arranges time with a pastor to have a 60 minute session. Many times this is 1 on 1 or with a couple.

Feature: AI Social Clips

Problem:

Many pastors create extensive video sermons but seek to effectively convey their messages on social media through shareable short clips.

Solution:

PrayStudio provides a simple and effective solution for pastors to upload their video sermons. With just a click of a button, PrayStudio utilizes AI technology to segment the content, transforming it into engaging viral social clips.

- **AI-driven convenience:** Effortlessly transform long sermons into short, professional, and shareable videos.
- **Save time and resources:** Focus on your ministry while our technology handles video editing and content optimization.
- **Expand your ministry:** Use the power of social media to share the Gospel and engage with newer, younger, and global audiences.

Don't just preach—reach. Your message has the power to change lives. Make sure it's heard everywhere.

Feature: Workflow AI

Problem:

The pastor's role extends beyond inspiring and saving souls; it involves bringing people closer to God through various means. This task demands more than merely delivering sermons to the congregation. To effectively expand their digital ministry, pastors must create social media

posts, write emails, craft blog articles, and develop study guides. These efforts are essential for building a robust digital presence and fostering a deeper connection with their community.

Solution:

PrayStudio's Workflow AI empowers pastors and volunteers by automating daily tasks, helping to broaden their digital outreach. When you upload a sermon to PrayStudio, the Workflow AI initiates the following actions:

- **Automatic Summarization:** The AI summarizes your sermon and generates inspirational quotes and verses, making it easy to share on various social media platforms.
 - **Social Clips:** It automatically creates short, viral video clips, tweets, descriptions, and tags, allowing you to effortlessly generate engaging social media posts from your sermons. You can seamlessly integrate with social platforms to schedule your posts.
 - **Voice Translation:** The Workflow AI translates all of your sermons using your voice, ensuring consistency and personalization.
 - **Email and Announcement Generation:** It automatically generates emails and announcements based on your sermons, keeping your audience informed about your latest messages.
 - **Blog and Study Guide Creation:** Workflow AI enhances your processes by automatically generating blog articles and study guides based on your sermons. This feature saves you valuable time in writing, allowing you to focus more on cultivating your community.
-

Feature: AI Translations

Problem:

Leaders have a lot of audio and video sermons but do not speak different languages to reach people globally.

Solution:

Pray Studio offers an innovative solution that automatically translates video and audio sermons into over 30 languages with just a single button click, utilizing the pastor's voice. This technology saves pastors valuable time and resources and leverages AI, eliminating the need for an agency or a voice-over actor to perform the translations.

Feature: AI CRM (Customer Management)

Problem:

Pastors want to communicate with their followers from PrayStudio

Solution:

PrayStudio CRM provides a comprehensive suite of solutions for pastors to effectively engage with their congregations through email, announcements, and direct messaging.

Email Solution: With PrayStudio, pastors can effortlessly create emails using pre-designed templates or use an intuitive drag-and-drop editor to personalize layouts, calls to action, and branding.

Announcements Solution: Pastors can post text and share video and audio content in announcements to a feed, ensuring that all their prayer followers remain informed.

Direct Message Solution: Pastors can send direct messages to their followers and vice versa, facilitating personal conversations within the prayer studio.

Testimonials: Pastor followers can write testimonials to the pastor, sharing how the content has positively impacted their lives. This process effectively completes the feedback loop regarding the pastor's influence.

Pray's Marketing Calendar allows you to effortlessly automate, schedule, and manage your marketing campaigns directly from Pray Studio.

Feature: AI Ministry Insights

Problem:

Pastors constantly produce sermons and share them digitally, but they lack the data to understand who their audience is and what they're listening to or watching.

Solution

PrayStudios' Customer Data Platform (CDP) offers pastors a suite of robust solutions:

- **Analytics Dashboards:** These dashboards enable pastors to analyze listening and viewing data, revealing insights into the most popular content, shares, and more.
- **Pray's Periodic Table of Personas:** This tool transforms data into actionable strategies. It helps identify the types of individuals most engaged with your ministry and unreached audiences, facilitating growth. Leverage machine learning to enhance your digital strategy effectively.

- **Social Integration:** Consolidate your social media efforts in one place and utilize Pray's Advanced Data Architecture to extract valuable insights that drive meaningful impact.
-

Feature: AI Audio Books

Problem:

Many pastors author numerous books, yet they often lack the time to transform these works into audiobooks. This process demands extensive studio hours for recording, making it quite time-consuming.

Solution

PrayStudio now empowers pastors to effortlessly upload their books and leverage advanced artificial intelligence technology to transform their written works into audiobooks in just minutes, all by using their own voice.

Feature: AI CMS (Content Management System)

Problem:

Pastors want to communicate with their followers from PrayStudio

Solution:

PrayStudio CRM provides a comprehensive suite of solutions for pastors to effectively engage with their congregations through email, announcements, and direct messaging.

Email Solution: With PrayStudio, pastors can effortlessly create emails using pre-designed templates or use an intuitive drag-and-drop editor to personalize layouts, calls to action, and branding.

Announcements Solution: Pastors can post text and share video and audio content in announcements to a feed, ensuring that all their prayer followers remain informed.

Direct Message Solution: Pastors can send direct messages to their followers and vice versa, facilitating personal conversations within the prayer studio.

Testimonials: Pastor followers can write testimonials to the pastor, sharing how the content has positively impacted their lives. This process effectively completes the feedback loop regarding the pastor's influence.

Pray's Marketing Calendar allows you to effortlessly automate, schedule, and manage your marketing campaigns directly from Pray Studio.

Feature: Periodic Table

Problem

Ministry leaders often struggle with the challenge of effectively understanding the vast and varied data from their followers on digital platforms. Traditional data analysis tools offer limited insights, particularly in understanding the demographic layers of engagement. This gap hinders the ability of ministries to effectively tailor their content and outreach, making it difficult to fully connect with their diverse audience.

Solution

Period Table addresses this need by offering a simple yet powerful demographic breakdown of a leader's Pray data. It goes beyond presenting raw data, diving into the demographics of followers' interactions and engagement. This innovative approach not only enhances understanding but also guides the development of more effective content and outreach strategies. The uniqueness of Period Table lies in its ability to turn data into demographic narratives, paving the way for a range of future tools that can leverage these insights.

Periodic Table of People:

We built the periodic table of people to help you easily segment [PRAY.COM](https://prayer.com) members interacting with your content to display a breakdown in a Periodic Table view to help you better understand your audience and create a more meaningful impact on their lives.

This help article will help you understand how to use the Periodic Table of People.

Who are all the people in the Periodic Table of People?

All the people who show up on the Periodic Table of People are [PRAY.COM](https://prayer.com) members who have listened, watched, or shared your content, along with other data points that [PRAY.COM](https://prayer.com) is tracking to build your personal Periodic Table of People.

Viewership:

The viewership blocks at the top of the Periodic Table of People segment your audience into different buckets. The Viewership blocks are colors that bundle the segments in the Periodic Table of People to help you identify which segments correspond to your viewership. The highest viewership will always order from left to right.

What is viewership?

Viewership is the percentage of [PRAY.COM](https://prayer.com) members listening and watching the content you have distributed on [PRAY.COM](https://prayer.com).

Minutes in Prayer :

The Minutes in Prayer Bar displays the total number of minutes users spend on [PRAY.COM](https://prayer.com), ordered from highest to lowest (left to right). The segments on the bar are color-coded according to the Minutes In Prayer to make it easier to identify which users have spent the most time on [PRAY.COM](https://prayer.com).

Segment Element:

- **Element Color:** Each element will have a corresponding color to the viewership blocks located at the top of the Period Table of People. We have grouped elements by color and rank to help quickly inform you which segments have the highest viewership.
- **Rank:** The number located on the top right of the segment element displays the rank of the segment ordered by viewership. The element with the number 1 means those segments of users have the highest viewership rank amongst all the other elements.
- **Symbol:** Symbol is the abbreviation of the segment name for the element. For example, EUB is an abbreviation of the Elite Urban Boomers segment.
- **Name:** Elements will show the name of the segment that [PRAY.COM](https://prayer.com) has classified those users to be part of the element.
- **Minutes in Prayer:** The number of Minutes in Prayer displays the total number of minutes the users in the element have spent on [PRAY.COM](https://prayer.com).
 - The Minutes in Prayer have a corresponding color to the Minutes in Prayer Bar located at the top of the Periodic Table of People to help you easily identify which segments have spent the most time on [PRAY.COM](https://prayer.com).
- **Listens:** Listens are the percent of users within the element segment listening to your content on [PRAY.COM](https://prayer.com).
- **Shares:** Shares are the percent of users within the element segment listening to your content on [PRAY.COM](https://prayer.com).
- **Follows:** Follows are the percent of users within the element segment listening to your content on [PRAY.COM](https://prayer.com).

Feature: Subscription+

What Is [Pray.com](https://pray.com) Subscription+ for Leaders?

Subscription+ is [Pray.com](https://pray.com)'s revenue-sharing program that transforms every premium user subscription into a **sustainable stream of funding** for your ministry.

When a [Pray.com](https://pray.com) user upgrades to a premium subscription, they can designate a ministry they love—you. **Your ministry then receives 70% of that user's monthly subscription revenue**, automatically.

What Do Leaders Gain?

1. Recurring Revenue Without Fundraising

- No need to launch another giving campaign.
- Each subscription turns into a monthly donation—on autopilot.

2. Financial Support from Digital Followers

- Converts casual listeners into **financial supporters**.
- Users who are blessed by your content can directly support your mission with a click.

3. Stronger Audience Connection

- Empowers your audience to “put their money where their faith is.”
- Increases ownership and loyalty as supporters feel invested in your impact.

4. Zero Administrative Overhead

- [Pray.com](https://pray.com) handles the billing, revenue sharing, and management.
- You receive payouts and insights—**no tech setup or extra manpower needed**.

Why It's Different from Other Tools

Feature	Subscription+	Traditional Giving Tools	YouTube/Podcast Monetization
Recurring Revenue	 Built-in through subscriptions	Requires setup & stewardship	Limited, ad-based

Audience Targeting	✅ Faith-first platform, no distractions	❌ Requires outside traffic	❌ Mixed, unpredictable audiences
Zero Extra Work	✅ Fully managed by Pray.com	❌ Manual processes	❌ Requires large scale & sponsors
70% Revenue Share	✅ Industry-leading payout	❌ Typical fee-based platforms	❌ < 30% payout on avg

It's not just a donation platform. It's a digital discipleship engine that funds your mission.

✝ In a Leader's Words:

“It’s like getting surprise monthly support from people who’ve never walked into my church—but found my voice through Pray.com.” – Ministry Leader on Subscription+

🔗 Feature: Ministry Match

💡 What Is Ministry Match for Leaders?

Ministry Match is a proprietary audience growth tool within Pray.com that helps ministries **expand their email list and reach new followers**—automatically.

It works by intelligently connecting your ministry to **users on Pray.com who are already engaging with content similar to yours**. These users are then invited to opt in to your email list and start receiving your messages.

💡 What Do Leaders Gain from Ministry Match?

1. High-Intent Email List Growth

- Gain new, permission-based email subscribers who are **already interested** in your style of content.
- These aren’t cold leads—they’re spiritually hungry users who *chose* to connect with your ministry.

2. Audience Expansion Beyond Social Media

- Tap into [Pray.com](https://pray.com)'s 18M+ users.
- Reach people **outside your current circles**, many of whom aren't on your social channels or email list yet.

3. Zero Ad Spend, Zero Setup

- No need to run Facebook ads or manage complicated funnels.
- [Pray.com](https://pray.com) does all the matching and prompting for you—you **just focus on serving** the new audience you gain.

4. Quality Over Quantity

- Ministry Match isn't just about more people—it's about **the right people**.
- You're connected with users based on engagement history, content interest, and faith behavior—not vague demographics.

Why Ministry Match Is Different

Feature	Ministry Match	Traditional Email Opt-In	Paid Ads (Facebook/Google)
Audience Targeting	 Pray.com faith-based behavioral data	 Passive, requires traffic	 Often broad or cold targeting
Email Growth	 Built-in opt-in from engaged users	 Slow, manual	 Expensive and low intent
Effort Required	 Hands-off	 Needs content & setup	 Needs budget, creatives, testing
Faith-Aligned Users	 100% spiritually active	 Hit or miss	 Competes with secular content

Pray.com isn't just helping you grow your list—it's helping you grow your mission.

 Leader Quote to Use:

“We used to spend thousands on Facebook ads. Now, with Ministry Match, people who love our message are joining our list every day—without lifting a finger.” – Pastor using Pray Studio
